# CREATE TRUST STORE
with KeyStore Explorer 5.4.1

KeyStore Explorer is a free GUI tool for managing certificates, which is available for all common operation systems: https://keystore-explorer.org/downloads.html
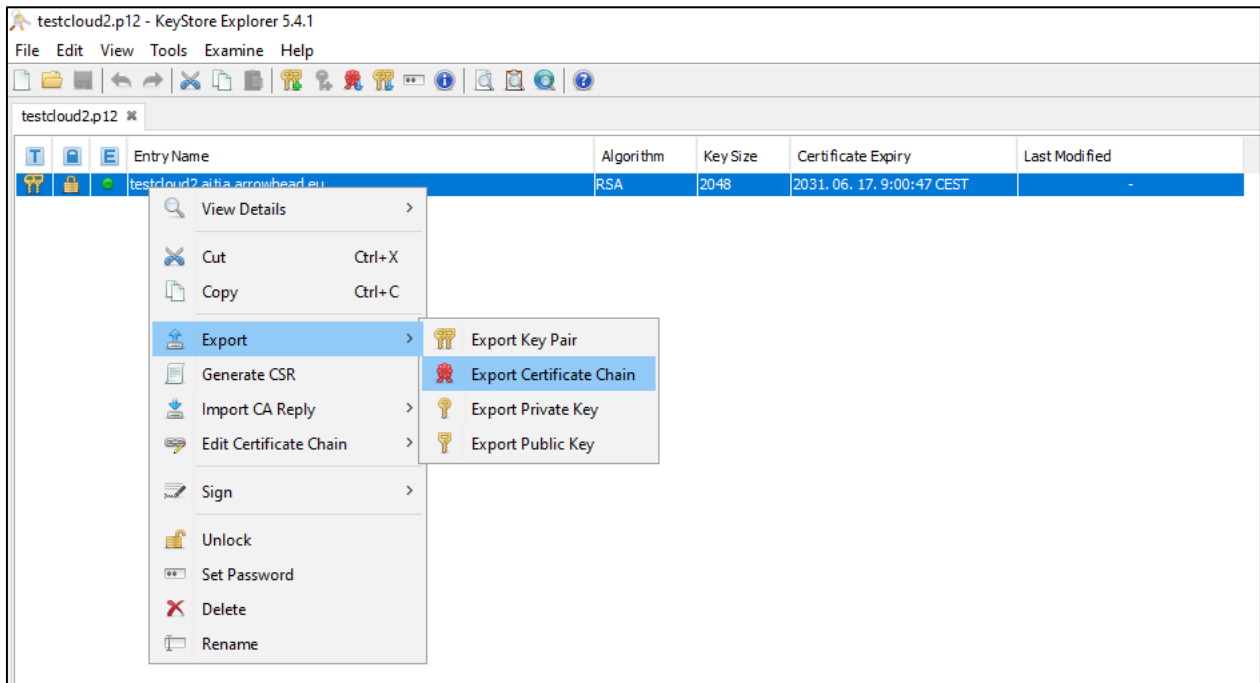

1st STEP:

Open your cloud **p12** certificate file.

2nd STEP:

Right click on your cloud key pair entry and select "Export Certificate Chain":

3rd STEP:

Select "Head Only", "X.509", tick "PEM" and changed the extension to ".crt":

4th STEP:

Go to "File" -> "New" and select "PKCS#12":
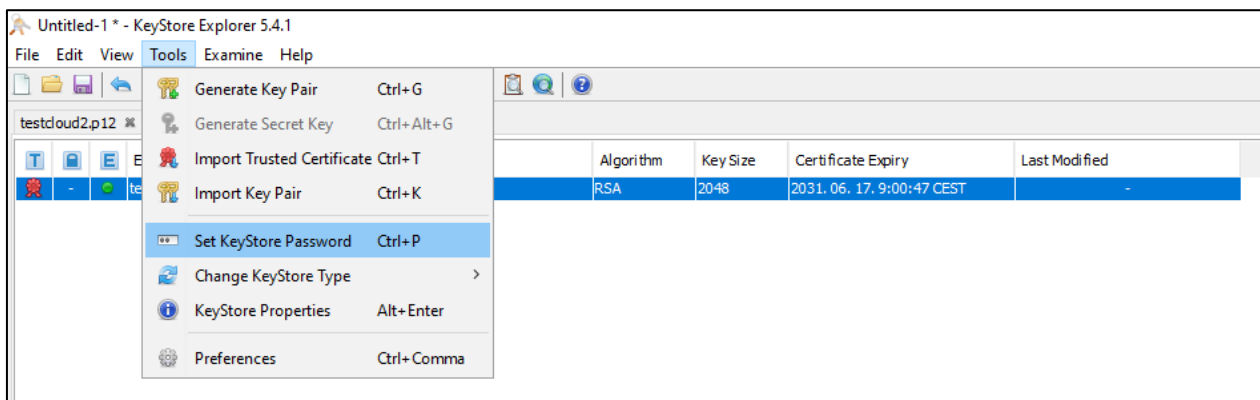

5th STEP:

Click on the "Import trusted Certificate" button and import the "crt" file created just before:

6th STEP:

Set the "KeyStore Password":

7th STEP:

"File" -> "Saves as" -> truststore.p12
